

SUPER SIX HEAVY-DUTY BASKETBALL SYSTEMS

Customize the Super Six to meet your specific needs:

- 4 - Backboard Options
- 4 - Rim Options
- 2 - Installation Options

Features & Specifications

- **Strong** 4" square structural steel with 3/16" wall thickness.
- **Rigid** - Rim mounts through the backboard and directly to the extension arm for maximum safety and better rebound.
- **Attractive** acrylic powder-coated finish to prevent chipping and provide ultimate corrosion protection.
- **Easy-to-Install** 3-piece design allows for minor adjustments in height and squareness to the playing surface.
- **Designed for Safety** - A 72" extension arm for maximum safe-play area. The unique top-cap design reduces the possibility of the extension arm slipping or falling resulting in an injury.
- **Custom** extension sizes available at 36", 48" and 60".
- **Protective Padding** - Custom outdoor weather-resistant pole and backboard pads are available in a variety of colors.

Backboard Options

Front

Back

RPGR: Rectangular Clear Acrylic

1/2" thick shatter proof clear acrylic is fade resistant and will never fog or cloud. The acrylic is also highly resistant to scuffs and abrasions. Backboard is encased in an all aluminum frame, completely supported by a welded steel back frame. Directly mounts to extension for increased safety and better rebound. Standard 5" x 5" hole pattern. Comes complete with mounting hardware and aluminum sway braces.

- 42" x 60" playing surface
- Shatter-proof clear acrylic
- 10-Year limited warranty

FAL: Fan Shaped Aluminum

Extra-strength mounting support structure with standard 5" x 5" hole pattern. Directly mounts to extension for increased safety and better rebound. Comes complete with mounting hardware and aluminum sway braces.

- 39" x 54" Playing surface
- Heavy-duty aluminum
- Official orange painted target
- 10-Year limited warranty

RST: Rectangular Steel

Constructed from heavy-duty 12-gauge steel. White graffiti resistant powder coated finish with official orange target. Extra-strength steel mounting support structure with standard 5" x 5" hole pattern. Safety rolled edges eliminates potential injuries and increases strength and rigidity. Directly mounts to extension arm for increased safety and better rebound. Mounting hardware and aluminum sway braces are included.

- 42" x 60" playing surface
- Graffiti resistant powder-coated finish
- Heavy-duty steel
- Official orange painted target
- 10-Year limited warranty

FST: Fan Shaped Steel

Made from heavy-duty 12-gauge steel. White graffiti resistant powder-coated finish with official orange target. Extra-strength steel mounting support structure with standard 5" x 5" hole pattern. Directly mounts to extension for increased safety and better rebound. Mounting hardware and aluminum sway braces are included.

- 39" x 54" playing surface
- Graffiti resistant powder-coated finish
- Heavy-duty steel
- Official orange painted target
- 10-Year limited warranty

Goal Options:

Pressure Flex™ Moveable Goal

- Durable 5/8" solid steel
- Powder-coated finish
- Shock absorbing mechanism enclosed within a formed steel cover
- Meets specifications for moveable goals
- 12 no-tie net holders

Dura Goal I™

- Double steel ring goal with 5/8" top and 1/2" bottom
- Twin brace bars are 1/2" top and 3/8" bottom
- Powder-coated finish
- 12 no-tie net holders

Dura Goal II™

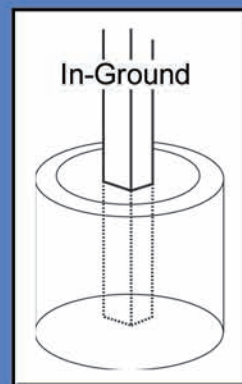

- Double steel ring goal with 5/8" top and 1/2" bottom
- Twin brace bars are 1/2" top and 3/8" bottom
- Bottom ring is indented to allow for steel net to be fastened to the goal using "S" hooks
- Powder-coated finish

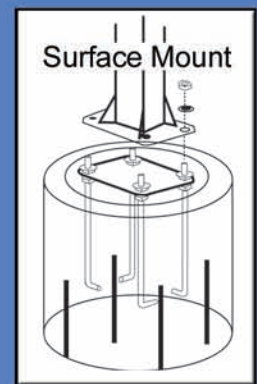

BG-1

- Single 5/8" solid steel ring
- 1/2" V-shaped steel braces
- 12 no-tie net holders
- Powder-coated finish

Installation Options

Standard in-ground installation.

Heavy-duty anchor installation system for surface mounting.
